A mountain belt just to the north, in the western segment of the island, forms the second region; it is partially composed of sediments derived from eroded volcanoes and includes a number of heavily cultivated alluvial basins, especially around the cities of Bandung and Garut. All events infer simple one-date admixture between two source populations. Across its many islands, Indonesia consists of distinct ethnic, linguistic. Inferred admixture events were classified into three types: one-date admixture OD, involving a pair of mixing sources ; one-date-multiway admixture MW, involving two pairs of mixing sources ; and uncertain U.
