The first step is knowing how to identify the problem. The National Institute for Health and Care Excellence NICE has published a clinical guideline on a model for service provision for pregnant women with complex social factors. Last Updated: August 15,

They typically weigh the positive and negative aspects of making a change. Sp Most people do not immediately sustain the new changes they are attempting to make, and a return to substance use after a period of abstinence is the rule rather than the exception Brownell et al. This is a summary of the views of the people who responded to the consultation, about how they thought that joint working could be improved. Focus on Less Intensive Treatments A corollary of the new emphasis on earlier

intervention and individualized care is the provision of less intensive, but equally effective, treatments.

Lack of community support, such as barriers to healthcare, employment, and alcohol and drug treatment services can do some things to help prevent later harmful consequences for both parents and children, including: . Extra precautions may be necessary to keep from reverting to problematic behaviors.
