When she came in for treatment, she described her emotions and thoughts as out of control. An element of safety that is rarely discussed in the trauma treatment literature, but reflects a commitment by the therapist to cultural awareness as well as trauma, is that of spiritual safety. Events that would not normally be disabling can produce symptoms of intense helplessness and fear, numbing and depersonalization, disabling anxiety, and an inability to handle normal life events.

An important clinical issue in understanding the impact of trauma is the meaning of trauma. Like PTSD, the symptoms can be misdiagnosed as depression, anxiety, or another mental illness.
