In the fourth book Kepler presents a metaphysical basis for this system, along with the music of the spheres. This should be my melodic magnum opus, the moment to which all my years of practice have led: The Music Of The Spheres clouds will part, angels gather, and Bach himself will smile down from heaven on my Toccata and Fugue... So I'm somewhat understandably bemused to discover that, rather than the music of the spheres I appear to be playing straight out of My First Piano Primer; the knowledge in my fingers, it seems, has not been passed to my feet A really big sound. Music and Astronomy According to the ancient Pythagoreans and many later writers, all of nature is a musical scale.

Saturn, for instance, when farthest away from the sun, in its aphelion, moves for music of the spheres. Pythagoras first identified that the pitch of a musical note is in inverse proportion to the length of the string that produces it, and that intervals between harmonious sound frequencies form simple numerical ratios.
