lymphatic filariasis, onchocerciasis, schistosomiasis,  
soil-transmitted helminths and trachoma, but they can cause  
severe pain and life-long disabilities – and mean enormous  
productivity losses.

The economic and political structures which sustain poverty and discrimination  
in this sense, high rates of TB constitute a reflection of the  
fact that certain populations face important obstacles in  
their exercise of the right to health, and other economic,  
social and cultural rights, due to the main social  
determinants of this disease being associated to social  
exclusion and poverty [ 31 ]. Of these 13 cases, one had not  
received any anti-TB treatment and six had defaulted from  
anti-TB treatment.
